

Stockwell Day
said **dinosaurs**
roamed the earth
at the same time
as humans...

Turns out he was right.

Canadians were proud to join other countries in the Kyoto agreement to fight global warming. Now Stephen Harper wants to break our commitments and back out of the treaty. Do we really want our children to inherit a world of more droughts, more extreme weather, and an old polluting economy?

**Stephen Harper may prefer extinction,
but the rest of us deserve a fighting chance.**

Don't vote for dinosaurs.
